

**BORLAND'S**

The Home of Good Wall Paper  
**WALL PAPER TALK No. 6.**

**The Hall**—First impressions are lasting and it is therefore essential that a good impression is secured. Entrance to the house is usually through the hall or reception room; for that reason it should suggest hospitality and be to some extent an index of what is to follow. Formerly the hall was not considered a part of the house and was a dark, gloomy place, a sort of a purgatory through which the travel had to pass to reach the heavenly rest beyond. Now, however, the decorations are more in keeping with the adjoining rooms. But care should be taken to have all the rooms in harmony. Our decorative department is at your service.

**KENTUCKY CROP REPORT  
AS OF MAY FIRST.**

"After a drouth, a good crop year" is an old saying that is believed by most farmers, in truth there seems to be some scientific basis for this. The first crop report for the year 1914 would indicate that this year would be no exception to the rule. Probably never in the history of the State was there a more promising outlook for a "good crop year" than at the beginning of the season.

The wheat acreage of last fall is given at 95 and practically none of this was plowed up this Spring. Ninety-seven per cent. of the original sowing was left standing May 1st. The condition of this large acreage is 99. This would indicate an unusually large yield of wheat. The original acreage of rye sown last fall was 95. Rye is used more as a clover crop than wheat, a large per cent of which is plowed up in the Spring for corn or oats. For the last few years rye has proven a more profitable crop than wheat per acre and it is no surprise to find that 82 per cent. of the original acreage is left standing. The amount of barley originally sown was 77 and the condition of both rye and barley is given at 98. The corn acreage planted is 91 per cent. while 76 per cent. of the plowing intended for corn was done May 1st. Planting is now in full swing with conditions favorable. Deep plowing has been practiced this year more than ever before. Favorable weather for the next few weeks will insure a large acreage of corn in a first-class seed bed. The oat acreage planned is given at 89 with 80 per cent. of it sown May 1st.

While the dark tobacco crop planned is only 79, the condition of plant beds is given at 96. The acreage planned of Burley is given at 81 with the condition of plant beds 91. There is some complaint of insects and cut worms injuring the tobacco beds.

The pastures are in unusually good condition. The condition of blue grass is given at 93 with every promise of a large crop of blue grass seed. Clover is given at 85, alfalfa 93, and orchard grass at 92.

Fruits of all kinds have escaped destruction by freezing and the apple, cherry and plum crop is unusually promising. Pears and peaches suffered some from late frost, especially in the central part of the State, however, we will have more than three-fourths of a pear and peach crop. The strawberries are in good condition with promise of a bountiful yield. Ninety-five per cent. of a potato crop is planted.

Live stock of all kinds came through the winter in good condition. It is estimated that 4 per cent. of the horses died in the last 12 months, 3 per cent. of the mules and 3.7 per cent. of the cattle. The loss of sheep is estimated at 6 per cent. and lambs at 10 per cent. The greatest loss is from hog cholera and it is estimated that 11.3 per cent. of the hogs of the State were lost by this disease, some sections of the State being entirely free from this disease, while the loss runs as high as 50 per cent. in other sections. This report indicates that there is an unusual amount of attention being paid to live stock. The number of brood mares used is increasing and the number of mules used upon the farm decreasing. It is also worthy of note that a great deal more attention has been paid to alfalfa this Spring than ever before. The amount of ground limestone used upon the clover land has greatly increased.

Summing up the first report of the year, one cannot but be impressed with the determination of the farmers to make the coming crop the greatest ever grown in the State.
